ADONAI
ADONAI AGRO & ENERGY SERVICES LTD

BUSINESS MODEL

ADONAI Agro & Energy Sevices Limited process supports this structure: sourcing is followed by quality control, required export documentation, logistics, and shipment/delivery. NEPC specifically identifies export documentation and logistics as core stages of the export process, while FPIS outlines quality testing, packaging, weighing and fumigation for agricultural commodities.

Direct Farmer Sourcing

We source agricultural commodities directly from farmers and trusted supply networks, helping establish reliable access to quality produce while maintaining traceability through the supply chain.

Processing

Where required, commodities are cleaned, dried, graded, sorted or otherwise prepared to meet the specifications of the target market and buyer.

ADONAI
ADONAI AGRO & ENERGY SERVICES LTD

Quality Inspection

Products undergo quality checks to verify factors such as grade, moisture, weight, packaging and overall export readiness. Nigerian agricultural exports may also require relevant inspection, fumigation and phytosanitary certification.

Export Documentation

We coordinate the documentation required for compliant international trade, including commercial documents, inspection certificates, certificates of origin and other applicable regulatory documents.

Logistics

We coordinate transportation, warehousing, containerization and freight arrangements to move commodities efficiently from the supply point toward the designated port and onward destination.

International Delivery

Products are shipped to international buyers according to agreed specifications, commercial terms and delivery arrangements, completing the supply chain from Nigerian producers to global markets.

PRODUCTS & SERVICES

AGRICULTURAL COMMODITIES & EXPORT SERVICES

PRODUCTS & SERVICES

AGRICULTURAL COMMODITIES & EXPORT SERVICES

Nigerian Hardwood Lump Charcoal & Biomass

Premium Nigerian hardwood lump charcoal and biomass products sourced for commercial and international markets, with attention to consistency, preparation and export requirements.

Nigerian Ginger

Quality Nigerian ginger sourced through established agricultural supply networks for buyers seeking dependable supply and export-ready products. Nigerian ginger is recognized by NEPC for its distinctive pungency and oleoresin content and is available in forms including fresh, dried-split and crushed ginger.

Nigerian Chilli Pepper

Nigerian chilli pepper sourced for food, spice and ingredient markets, with product handling and specifications aligned with buyer requirements.

PRODUCTS & SERVICES

AGRICULTURAL COMMODITIES & EXPORT SERVICES

Raw Cashew Nuts (RCN)

Raw cashew nuts sourced from Nigerian producing areas and supplied according to agreed buyer specifications, quality requirements and commercial terms.

Nigerian Sesame Seeds

Export-oriented Nigerian sesame seeds sourced and prepared to meet buyer specifications. NEPC identifies Nigeria as a major sesame producer and exporter, with the sector supplying international markets across the Middle East and Asia.

Export Sourcing Services

End-to-end sourcing support for international buyers seeking Nigerian commodities, including supplier identification, product sourcing, quality coordination, documentation and logistics support.

AGRICULTURAL PRODUCTS

- NIGERIAN GINGER
- NIGERIAN CHILLI PEPPER
- RAW CASHEW NUTS (RCN)
- NIGERIAN SESAME SEEDS
- HARDWOOD LUMP CHARCOAL & BIOMASS

01

NIGERIAN GINGER

Nigeria produces ginger valued for its strong flavour and high oleoresin content. It is commercially supplied as fresh, dried-split and crushed ginger.

Varieties: UG1 Grade, Tafea Grade
Origin: Kaduna, Benue, Nasarawa
Forms: Fresh | Split Dried | Slices | Powder

Moisture ≤12% | Oil Content ≥2.5% v/w | Foreign Matter ≤0.5% | High Pungency & Strong Aroma

Packaging: 25kg/50kg PP Bags + PE Liner

02

NIGERIAN CHILLI PEPPER

Nigerian chilli pepper is cultivated for its characteristic heat, flavour and colour and can be supplied fresh or in dried/ processed forms depending on buyer specifications.

Varieties: Bird's Eye, Cayenne, Tatase
Origin: Northern Nigeria
Forms: Dry Whole | Crushed | Powder

Moisture ≤10% | Bird's Eye Pungency: 50,000-100,000 SHU | Aflatoxin: ≤10 ppb Total, ≤5 ppb B1 | Colour Value ≥80 ASTA

Packaging: 25kg/50kg PP Bags + PE Liner

03

RAW CASHEW NUTS (RCN)

Raw cashew nuts are the unprocessed nuts harvested from cashew trees and supplied primarily to processors for conversion into cashew kernels and other cashew products. Nigeria has a significant cashew production base spread across numerous states.

Varieties: Nigerian Native, Improved Seedlings
Origin: Kogi, Oyo, Benue

Outturn: 48/50 lbs | Kernel Count: 180-210 Nuts/kg | Moisture ≤9% | Admixture ≤1% | Damaged Nuts ≤3% | Kernel Yield ≥27%

Packaging: 80kg New Jute Bags

04

NIGERIAN SESAME SEEDS

Sesame is an important Nigerian export crop available in varieties including white, black and hulled sesame. Nigerian sesame is valued for its relatively high oil content and export suitability

Types: Natural White | Mixed
Origin: Benue, Jigawa, Nasarawa

Purity: 98-99% | Oil Content ≥50% | Moisture ≤6% | Admixture ≤1% | Free Fatty Acid ≤1%

Packaging: 50kg PP Bags + PE Liner

05

HARDWOOD LUMP CHARCOAL & BIOMASS

Nigerian hardwood lump charcoal is produced from selected wood sources and supplied as a carbon-rich solid fuel. Biomass products provide alternative fuel and energy applications. Nigeria's export-potential research identifies wood charcoal among products with significant export potential.

Main Producing States:

Production and sourcing occur across several forest and savannah regions of Nigeria; sourcing should be tied to legally permitted and traceable supply chains.

Species: Iroko (Milicia excelsa), Azobe, Mahogany

Sourcing: Legally sourced from managed plantations. No softwood. No mangrove.

Grades: BBQ Grade | Restaurant Grade | Industrial Grade | Custom Specifications

Ash Content: ≤3% | Moisture Content: ≤8% | Low Spark | Fixed Carbon: ≥75% | Long Burning Time | Calorific Value: ≥7000 kcal/kg

Packaging: 25kg/50kg PP Bags + PE Liner. 5kg private label retail bags available.

PROCUREMENT, QUALITY CONTROL & SUPPLY CHAIN

SUPPLIER NETWORK

ADONAI Agro & Energy Services Limited builds its supply network through relationships with farmers, aggregators, processors and other reliable commodity suppliers across Nigeria. Supplier selection should consider product availability, quality, consistency, traceability and ability to meet agreed specifications.

A structured supplier network helps exporters maintain dependable supply while connecting agricultural producers with international buyers. NEPC identifies sourcing, quality assurance and consistent production as important strengths of Nigeria's export supply base.

INSPECTION PROCESS

Before commodities proceed to export preparation, products are inspected against agreed specifications. Depending on the commodity, this may include checks on:

- Appearance and grade
- Moisture content
- Foreign matter
- Weight and quantity
- Pest or infestation indicators
- Packaging condition
- Product cleanliness and general conformity

QUALITY ASSURANCE

ADONAI Agro & Energy Services Limited quality approach focuses on maintaining product conformity from sourcing through shipment. This includes supplier controls, inspection, appropriate testing where required, proper handling and documentation of quality specifications.

Where applicable, recognized Nigerian competent authorities provide export-related quality certification. NEPC specifically identifies NAQS for phytosanitary certification of agricultural commodities and NAFDAC for applicable processed and semi-processed food products.

WAREHOUSING

Proper storage is essential for protecting commodity quality between procurement and export. Products should be stored in suitable facilities with appropriate controls for cleanliness, moisture, pests, ventilation, handling and segregation.

NAFDAC's current warehouse guidance emphasizes Good Warehouse Practices and Good Storage Practices designed to minimize deterioration and spoilage during storage.

EXPORT PREPARATION

Once an order is confirmed, commodities are prepared according to the buyer's specifications and destination-market requirements. This can include final quality checks, grading, sorting, weighing, packaging, labelling, documentation, inspection and shipment coordination.

Export Operations

"Shipments are coordinated through appropriate Nigerian ports based on destination, cargo requirements and agreed shipping arrangements."

Ports of Shipment

ADONAI Agro & Energy Services Limited can coordinate shipments through Nigeria's major export gateways according to commodity type, destination, shipping line, container availability and buyer requirements.

Nigeria's principal seaports include Apapa and Tin Can Island in Lagos, while other major ports serve different regions and trade routes. NEPC notes that Nigerian exports are mainly moved through seaports and identifies Apapa and Tin Can among the country's busiest ports.

Incoterms

international transactions can be structured using applicable Incoterms® 2020, clearly defining the responsibilities, costs and transfer of risk between buyer and seller.

Depending on the transaction, relevant terms may include FOB, CIF, FCA and other applicable Incoterms® 2020 rules. The appropriate term should be agreed within the sales contract based on the shipment structure and buyer requirements. ICC's Incoterms® 2020 guidance distinguishes responsibilities for transport, costs, insurance, customs formalities and transfer of risk.

Export Documentation

ADONAI Agro & Energy Services Limited coordinates the documentation required to support compliant export transactions. Depending on the commodity, destination and transaction, documentation may include:

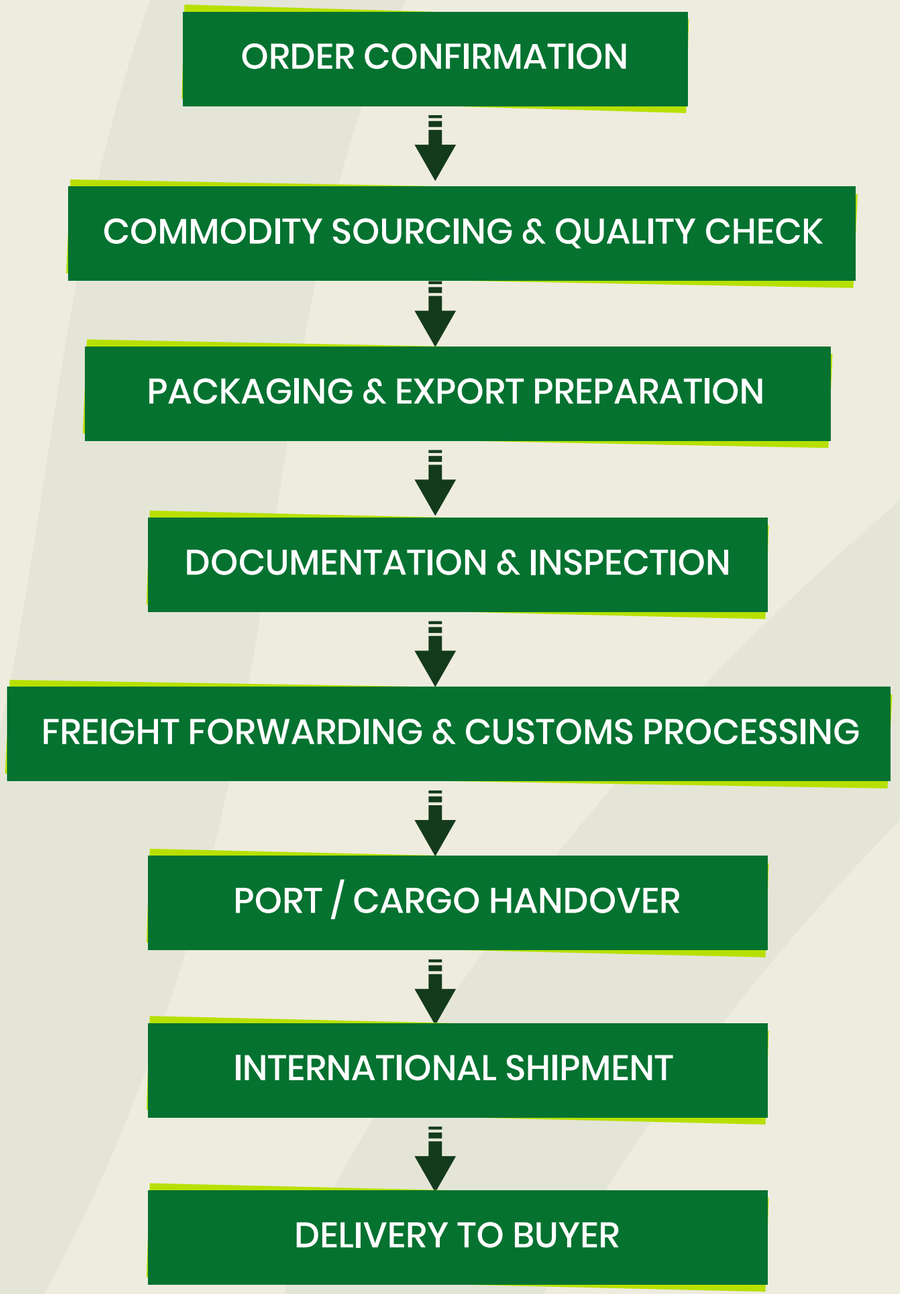

- Exporter's Certificate
- Proforma / Commercial Invoice
- Packing List
- Nigeria Export Proceeds (NXP) Form
- Clean Certificate of Inspection (CCI)
- Certificate of Origin
- Phytosanitary Certificate for applicable agricultural commodities
- Fumigation Certificate where applicable
- Bill of Lading or other applicable transport document

NEPC confirms these as part of the formal Nigerian export documentation framework, with specific certificates issued by the relevant competent authorities.

NEPC recommends that exporters understand transport modes, freight options, freight-forwarder responsibilities, delivery terms and the agreed terms of trade before shipment.

SHIPPING PROCESS

The export process follows a coordinated sequence:

Buyer Support

ADONAI Agro & Energy Services Limited role extends beyond simply supplying commodities. The company can provide coordinated support throughout the transaction, including:

- Product and specification discussions
- Quotations and commercial documentation
- Order coordination
- Quality and packaging coordination
- Shipment updates
- Documentation support
- Communication with logistics partners
- Delivery coordination

This fits the export model we established earlier: connecting Nigerian commodity supply with international buyers while maintaining communication and reliability throughout the transaction.

QUALITY ASSURANCE & COMPLIANCE

Quality Control

ADONAI Agro & Energy Services Limited quality-control approach should begin at the point of sourcing and continue through inspection, handling, storage, packaging and shipment. Products are assessed against agreed specifications to help maintain consistency in grade, cleanliness, moisture, weight, packaging and overall condition.

For agricultural exports, NAQS conducts inspection and certification of plant products and ensures that applicable phytosanitary requirements are met.

Laboratory Testing — Where Applicable

Where commodity specifications, buyer requirements or destination-country regulations require laboratory analysis, samples may be submitted for appropriate testing.Depending on the commodity, testing may address parameters such as moisture, contaminants, pesticide residues, microbiological quality or other product-specific requirements.

QUALITY ASSURANCE & COMPLIANCE

Product Traceability

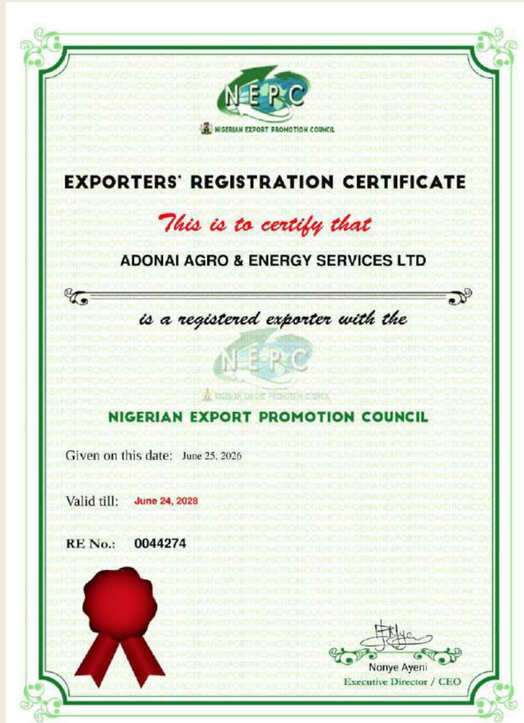

ADONAI Agro & Energy Services Limited maintain traceability across the supply chain by linking commodities to relevant sourcing, inspection, storage, packaging and shipment records.

- Traceability helps support:
- Supplier identification
- Product and batch identification
- Quality verification
- Documentation accuracy
- Buyer requirements
- Investigation and corrective action where necessary

This is particularly important for agricultural exports where the destination market may impose specific sanitary or phytosanitary requirements.

Export Compliance

ADONAI Agro & Energy Services Limited export operations follows applicable Nigerian regulations and the requirements of the destination market.

WHY BUYERS CHOOSE ADONAI

Direct Sourcing

ADONAI Agro & Energy Services Limited connects international buyers with Nigerian agricultural and natural-resource commodities through direct relationships with farmers, aggregators and established supply networks. This sourcing model supports better visibility across the supply chain and closer coordination of product specifications.

Competitive Pricing

ADONAI Agro & Energy Services Limited develops competitive export pricing by considering sourcing costs, quality requirements, packaging, logistics, documentation and applicable delivery terms. This allows pricing to reflect the complete cost of getting the required commodity from source to destination. NEPC identifies sourcing, packaging, logistics, warehousing, quality assurance, documentation and freight among the cost elements considered in export pricing.

ADONAI
ADONAI AGRO & ENERGY SERVICES LTD

Export-Quality Products

ADONAI Agro & Energy Services Limited focuses on supplying commodities that meet agreed buyer specifications and applicable export requirements. Quality assurance documentation and competent-authority certifications help demonstrate conformity where required for particular commodities and markets.

Reliable Documentation

ADONAI Agro & Energy Services Limited coordinates the commercial and export documentation required for transactions, according to the commodity, destination and agreed terms. Documentation can include commercial invoices, packing lists, certificates of origin, inspection documents and applicable phytosanitary or other regulatory certificates.

Responsive Communication

ADONAI Agro & Energy Services Limited maintains clear and responsive communication with buyers throughout the transaction, supporting coordination around product specifications, quotations, documentation, shipment arrangements and delivery updates. This is particularly important in international trade, where clear communication between buyer, exporter, freight partners and other stakeholders supports smoother execution.

Long-Term Partnerships

ADONAI Agro & Energy Services Limited focuses on developing lasting relationships with buyers and supply partners based on trust, consistency, transparency and dependable service. Rather than treating individual transactions in isolation, the company builds relationships around repeat supply, clear commercial terms and mutual value.

LEADERSHIP & FUTURE DIRECTION

Founder & Managing Director

ADONAI AGRO & ENERGY SERVICES LTD

Mr. Gabriel Kator Abeer

The Founder & Managing Director provides the strategic and operational direction of ADONAI Agro & Energy Services Limited, with a focus on developing reliable commodity supply channels, maintaining strong buyer relationships and connecting Nigerian agricultural resources with international markets.

The leadership approach combines entrepreneurial initiative, market understanding and hands-on coordination across sourcing, quality, documentation and export operations.

Management Philosophy

ADONAI Agro & Energy Services Limited management philosophy is built around integrity, accountability, quality, communication and long-term value creation. The company approaches commodity trading as a relationship-driven business, where dependable sourcing, transparent communication and consistent execution are essential to building confidence with suppliers, buyers and business partners.

Our management approach emphasizes:
Integrity — Quality — Reliability — Communication — Partnership
